

The Case Management Program welcomes families with children under 21, offering a supportive pathway to growth and stability. Over 3-6 months, families work with a dedicated Family Support Specialist who helps identify goals, connect with resources, and provide individualized support.

Our goal is to empower families to flourish in a nurturing environment where every family member feels supported and valued.

IT TAKES A WHOLE VILLAGE TO RAISE A CHILD

Case Management Program

How We Support

Set achievable goals

- Together, we'll identify priorities and create realistic next steps.

Navigate resources

- We'll connect you with programs and services that fit your family's needs.
- Access benefits and services
- We'll help you understand applications and paperwork.
- Build family strengths
- We'll share tools and information that support healthy family relationships.
- Provide ongoing support
- You'll have someone walking alongside you throughout the process.

What to Expect

Case Management is a partnership between your family and a Family Support Specialist. Together, you'll talk about your family's strengths and needs, identify goals, and develop a plan for moving forward.

Over the course of 3–6 months, you'll meet regularly to work toward those goals, connect with helpful resources, and adjust the plan as your family's needs change.

We'll work together throughout the process, adjusting goals and support as your family's needs change.

Working Together

Your participation is an important part of Case Management. Throughout the program, families are asked to:

- Attend scheduled meetings
- Participate in assessments and goal setting
- Work toward agreed-upon goals and next steps
- Complete paperwork or applications as needed
- Stay in communication with their Family Support Specialist
- Participate in learning opportunities when appropriate
